CONTENTS TO VOLUME 79

PART 1 20 JANUARY 1977

Numerical solutions of single-mode convection equations. JURI TOOMRE, D. O. GOUGH and E. A. SPIEGEL *page* 1

The acoustic field of sources in shear flow with application to jet noise: convective amplification. T. F. BALSA 33

Hydromechanics of lunate-tail swimming propulsion. Part 2. M. G. CHOPRA and T. KAMBE 49

Harbour resonance due to set-down beneath wave groups. E. C. BOWERS 71

A double-scale investigation of the asymptotic structure of rolled-up vortex sheets. J. P. GUIRAUD and R. KH. ZEYTOUNIAN 93

Oscillatory flows in ducts: a report on Euromech 73. E. BROCHER 113

Rotating elliptic cylinders in a viscous fluid at rest or in a parallel stream. HANS J. LUGT and SAMUEL OHRING 127

Obliquely interacting solitary waves. JOHN W. MILES 157

Resonantly interacting solitary waves. JOHN W. MILES 171

The calculation of flow fields by panel methods: a report on Euromech 75. H. KÖRNER and E. H. HIRSCHEL 181

Self-diffusion of particles in shear flow of a suspension. EUGENE C. ECKSTEIN, DOUGLAS G. BAILEY and ASCHER H. SHAPIRO 191

PART 2 22 FEBRUARY 1977

A moving fluid interface. Part 2. The removal of the force singularity by a slip flow. L. M. HOCKING 209

Experimental determination of the main features of the viscous flow in the wake of a circular cylinder in uniform translation. Part 1. Steady flow. MADELEINE COUTANCEAU and ROGER BOUARD 231

Experimental determination of the main features of the viscous flow in the wake of a circular cylinder in uniform translation. Part 2. Unsteady flow. MADELEINE COUTANCEAU and ROGER BOUARD 257

On the excitation of edge waves on beaches. A. A. MINZONI and G. B. WHITHAM 273

On a theory of amplitude vacillation in baroclinic waves. R. K. SMITH 289

The flow around a surface-mounted cube in uniform and turbulent streams. I. P. CASTRO and A. G. ROBINS 307

Spectral energy transfer in high Reynolds number turbulence. K. N. Helland, C. W. Van Atta and G. R. Stegen *page* 337

Hypersonic flow with attached shock waves over plane delta wings. B. A. Woods and C. B. G. McIntosh 361

Thermal convection in a Hele-Shaw cell. Beverly K. Hartline and C. R. B. Lister 379

On cavity flow at high Reynolds numbers. M. Nallasamy and K. Krishna Prasad 391

Reviews

Pertubation Methods in Fluid Mechanics, 2nd edition, by M. Van Dyke 415

Loose Boundary Hydraulics, 2nd edition, by A. J. Raudkivi 415

Part 3 9 March 1977

The stability of a rotating flow in the presence of an axial and a toroidal magnetic field. Chao-Ho Sung 417

The flow of a stratified fluid in a rotating annulus. P. F. Linden 435

Waves on water of varying depth: a report on an IUTAM symposium. L. A. Mysak, D. H. Peregrine, D. G. Provis and Ronald Smith 449

Directional slope and curvature distributions of wind waves. Jin Wu 463

Wave breakdown in stratified shear flows. M. T. Landahl and W. O. Criminale 481

The wave system attached to a slender body in a supersonic relaxing gas stream. Basic results: the cone. J. F. Clarke and Y. L. Sinai 499

On Green's functions for small disturbances of plane Couette flow. Philip S. Marcus and William H. Press 525

Energy stability of modulated circular Couette flow. Peter J. Riley and Robert L. Laurence 535

Features of a separating turbulent boundary layer in the vicinity of separation. Roger L. Simpson, J. H. Strickland and P. W. Barr 553

Intermittency in a thermal mixing layer. J. F. Keffer, G. J. Olsen and J. G. Kawall 595

Computing internal viscous flow problems for the circle by integral methods. R. D. Mills 609

PART 4 23 MARCH 1977

Analysis of compressible flows around a uniformly expanding circular cylinder and sphere. TAKEYOSHI KIMURA and MICHIHISA TSUTAHARA *page* 625

Upstream interactions in channel flows. F. T. SMITH 631

A note on quasi-geostrophic flow over topography in a bounded basin. J. E. HART 657

The unsteady laminar boundary layer on a rotating disk in a counter-rotating fluid. R. J. BODONYI and K. STEWARTSON 669

Weakly nonlinear stability of a viscous free shear layer. S. A. MASLOWE 689

On two-dimensional packets of capillary–gravity waves. V. D. DJORDJEVIC and L. G. REDEKOPP 703

On the evolution of the system of wind drift currents and Langmuir circulations in the ocean. Part 1. Theory and averaged current. S. LEIBOVICH 715

Asymptotic solutions for linearized disturbances in parallel viscous compressible flows. B. K. SHIVAMOGGI 745

On turbulent entrainment at a stable density interface. L. H. KANTHA, O. M. PHILLIPS and R. S. AZAD 753

Flow oscillations in a duct with a rectangular cross-section. J. S. ANDERSON, W. M. JUNGOWSKI, W. J. HILLER and G. E. A. MEIER 769

Asymptotic similarity of turbulence structures in smooth- and rough-walled pipes. A. E. PERRY and C. J. ABELL 785

On a solution of the Lavrentiev wake model and its cascade. ANCHING LIN and LOUIS LANDWEBER 801

REVIEWS

Continuum Mechanics. Concise Theory and Problems, by P. Chadwick 824

The Finite Element Method for Engineers, by Kenneth H. Huebner 825

JOURNAL OF FLUID MECHANICS

The JOURNAL OF FLUID MECHANICS exists for the publication of theoretical and experimental investigations of all aspects of the mechanics of fluids.

EDITORS

PROF. G. K. BATCHELOR, *Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England*

PROF. H. K. MOFFATT, *School of Mathematics, University of Bristol, Bristol BS8 1TW, England*

ASSOCIATE EDITORS

PROF. G. F. CARRIER, *Pierce Hall, Harvard University, Cambridge, Massachusetts 02138, U.S.A.*

PROF. S. H. DAVIS, *Department of Mechanics and Materials Science, The Johns Hopkins University, Baltimore, Maryland 21218, U.S.A.*

PROF. W. C. GRIFFITH, *Mechanical and Aerospace Engineering, North Carolina State University, Raleigh, North Carolina 27607, U.S.A.*

PROF. M. J. LIGHTHILL, *Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England*

PROF. J. W. MILES, *Institute of Geophysics and Planetary Physics, A–025, University of California, La Jolla, California 92093, U.S.A.*

PROF. J. R. A. PEARSON, *Department of Chemical Engineering and Chemical Technology, Imperial College, London SW7 2AZ, England*

PROF. O. M. PHILLIPS, *Department of Earth and Planetary Sciences, The Johns Hopkins University, Baltimore, Maryland 21218, U.S.A.*

PROF. J. S. TURNER, *Research School of Earth Sciences, The Australian National University, P.O. Box 4, Canberra 2600, Australia*

ASSISTANT EDITORS

DR H. E. HUPPERT, DR D. J. JEFFREY, DR M. E. MCINTYRE

EDITORIAL ASSISTANT

MISS M. E. LUCKING

Authors wishing to have papers published in the JOURNAL should communicate them to any editor named above, choosing one in their own country where possible. The submission of two or three copies will expedite the process of assessment, although it may not be possible to return all these copies. Original drawings for figures should not be sent until the paper is accepted.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts for the printer should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript.

Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Fluid Mechanics*, please apply to the London or New York office of Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in five volumes of four parts. Single parts cost £6.00 net (US $15.00 in the U.S.A. and Canada) plus postage. The subscription price (which includes postage) to volumes 79–83, 1977, is £20.00 per volume (US $47·50 in the U.S.A. and Canada) for institutions; £10.00 (US $23.50) per volume for individuals. Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue.

CONTENTS TO VOLUME 80

Part 1 4 April 1977

Asymmetric two-dimensional jet efflux from a channel. C. Samuel Martin *page* 1

A study of transonic flow around spheres. K. R. Jaikrishnan, A. Z. Szeri and W. M. Rohrer 17

The initial development of longitudinal dispersion in straight tubes. P. C. Chatwin 33

The near field in the mixing of a round jet with a cross-stream. Z. M. Moussa, John W. Trischka and S. Eskinazi 49

Spatial resonance of a liquid-filled vibrating beaker. Ian Huntley 81

Prediction of the contributions to the Reynolds stress from bursting events in open-channel flows. Hiroji Nakagawa and Iehisa Nezu 99

Laser light-scattering measurements of particle concentration in a turbulent jet. E. J. Shaughnessy and J. B. Morton 129

Note on a solitary wave in a slowly varying channel. John W. Miles 149

Response of a turbulent boundary layer to a step change in surface heat flux. R. A. Antonia, H. Q. Danh and A. Prabhu 153

Secondary flow due to Alfvén waves. J. A. Shercliff 179

Reviews

Hydraulics in the United States 1776–1976, *by Hunter Rouse* 203

Principles and Practice of Laser-Doppler Anemometry, by F. Durst, A. Melling and J. H. Whitelaw 204

Laser Doppler Measurements, by B. M. Watrasiewicz and M. Rudd 204

Asymptotic Wave Theory, by M. Roseau 206

Part 2 25 April 1977

Magnetohydrodynamic entry flow for a plane channel in an axial magnetic field. Gerald P. D'Arcy and Philip S. Schmidt 209

Propagation and reflexion of Alfvén–acoustic–gravity waves in an isothermal compressible fluid. N. Rudraiah, M. Venkatachalappa and P. Kandaswamy 223

Experiments on the fine structure of turbulence. M. A. Badri Narayanan, S. Rajagopalan and R. Narasimha 237

A porous prolate-spheroidal model for ciliated micro-organisms. STUART R. KELLER and THEODORE Y. WU *page* 259

On solutions of the compressible laminar boundary-layer equations and their behaviour near separation. T. DAVIES and G. WALKER 279

The asymptotic stage of longitudinal turbulent dispersion within a tube. R. DEWEY and PAUL J. SULLIVAN 293

High frequency limiting virtual-mass coefficients of heaving half-immersed spheres. A. M. J. DAVIS 305

The role of shear-layer instability waves in jet exhaust noise. C. J. MOORE 321

The collapse of a non-hemispherical bubble attached to a solid wall. A. SHIMA and K. NAKAJIMA 369

REVIEWS

Dynamic Meteorology, edited by P. Morel 392

Theoretical Rheology, edited by J. F. Hutton, J. R. A. Pearson and K. Walters 396

Dynamics of Relaxing Gases, by J. F. Clarke and M. McChesney 398

PART 3 2 MAY 1977

Finite disturbances and growing vortices in a two-dimensional jet. MOTOYOSHI IKEDA 401

Some gas flows which obey Charles' Law. J. F. CLARKE and C. A. COOPER 423

Heave and pitch motions in shallow water including the effect of forward speed. ALLEN PLOTKIN 433

Stokes flow in wedge-shaped trenches. C. H. LIU and DANIEL D. JOSEPH 443

Stratified non-diffusive flow over a horizontal flat plate. S. K. CHATURVEDI and G. S. JANOWITZ 465

On the evolution of the system of wind drift currents and Langmuir circulations in the ocean. Part 2. Structure of the Langmuir vortices. S. LEIBOVICH and K. RADHAKRISHNAN 481

On the stability of stratified viscous plane Couette flow. Part 1. Constant buoyancy frequency. A. DAVEY and W. H. REID 509

On the stability of stratified viscous plane Couette flow. Part 2. Variable buoyancy frequency. A. DAVEY and W. H. REID 527

Effects of water waves on the structure of turbulent shear flow. K. TAKEUCHI, E. LEAVITT and S. P. CHAO 535

The lateral migration of spherical particles sedimenting in a stagnant bounded fluid. P. VASSEUR and R. G. COX 561

The diffraction of surface waves by plane vertical obstacles. A. M. Ayad and F. G. Leppington *page* 593

Reviews

Turbulence, 2nd edition, by J. O. Hinze 605

Molecular Gas Dynamics, by G. A. Bird 607

Part 4 23 May 1977

Second-order spectral local isotropy in turbulent scalar fields. C. W. Van Atta 609

Cavitation noise and inception as influenced by boundary-layer development on a hydrofoil. William K. Blake, M. J. Wolpert and F. E. Geib 617

The hydraulics of rotating-channel flow. A. E. Gill 641

The round laminar jet: the development of the flow field. C. Sozou and W. M. Pickering 673

Continuation or breakdown in tornado-like vortices. Odus D. Burggraf and M. R. Foster 685

The stability of small amplitude Rossby waves in a channel. R. A. Plumb 705

Theory of the almost-highest wave: the inner solution. M. S. Longuet-Higgins and M. J. H. Fox 721

Cavitation in lubrication. Part 1. On boundary conditions and cavity–fluid interfaces. M. D. Savage 743

Cavitation in lubrication. Part 2. Analysis of wavy interfaces. M. D. Savage 757

Numerical solutions of the nonlinear α-effect dynamo equations. Michael R. E. Proctor 769

The separation of Stokes flows. D. H. Michael and M. E. O'Neill 785

Effect of external disturbances on the spreading rate of a plane turbulent jet. P. Bradshaw 795

ASSISTANT EDITORS

DR H. E. HUPPERT, DR D. J. JEFFREY, DR M. E. MCINTYRE

EDITORIAL ASSISTANT

MISS M. E. LUCKING

Authors wishing to have papers published in the JOURNAL should communicate them to any editor named above, choosing one in their own country where possible. The submission of two or three copies will expedite the process of assessment, although it may not be possible to return all these copies. Original drawings for figures should not be sent until the paper is accepted.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts for the printer should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript.

Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Fluid Mechanics*, please apply to the London or New York office of Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in five volumes of four parts. Single parts cost £6.00 net (US $15.00 in the U.S.A. and Canada) plus postage. The subscription price (which includes postage) to volumes 79–83, 1977, is £20.00 per volume (US $47·50 in the U.S.A. and Canada) for institutions; £10.00 (US $23.50) per volume for individuals. Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue.

CONTENTS TO VOLUME 81

PART 1 9 JUNE 1977

Propagation of hydromagnetic planetary waves on a beta-plane through magnetic and velocity shear. I. A. ELTAYEB and J. F. MCKENZIE *page* 1

Plane turbulent buoyant jets. Part 1. Integral properties. NIKOLAS E. KOTSOVINOS and E. J. LIST 25

Plane turbulent buoyant jets. Part 2. Turbulence structure. NIKOLAS E. KOTSOVINOS 45

Viscous attenuation of mean drift in water waves. AN-KUO LIU and STEPHEN H. DAVIS 63

The added mass of two-dimensional cylinders heaving in water of finite depth. KWANG JUNE BAI 85

Instabilities of longitudinal convection rolls in an inclined layer. R. M. CLEVER and F. H. BUSSE 107

The collapse of a viscous tube. J. A. LEWIS 129

Experiments on the structure of turbulence in fully developed pipe flow: interpretation of the measurements by a wave model. T. R. HEIDRICK, S. BANERJEE and R. S. AZAD 137

Self-preserving turbulent wall jets over convex surfaces. D. E. GUITTON and B. G. NEWMAN 155

Influence of helicity on the evolution of isotropic turbulence at high Reynolds number. J. C. ANDRÉ and M. LESIEUR 187

PART 2 24 JUNE 1977

The generation of Langmuir circulations by an instability mechanism. A. D. D. CRAIK 209

Doppler measurements of the effects of gravity waves on wind-generated ripples. PETER H. Y. LEE 225

The interaction between capillary waves and a current and wave decay. F. Y. SORRELL and G. V. STURM 241

Chemical amplification at the wave head of a finite amplitude gasdynamic disturbance. J. F. CLARKE 257

Novel Weissenberg effects. G. S. BEAVERS and D. D. JOSEPH 265

Viscous flow in collapsible tubes of slowly varying elliptical cross-section. ROSEMARY WILD, T. J. PEDLEY and D. S. RILEY 273

Numerical computation of Taylor vortices. A. K. Majumdar and D. Brian Spalding *page* 295

Developing flow on a vertical wall. K. J. Ruschak and L. E. Scriven 305

A chemical reaction in a turbulent jet. John R. Shea 317

A note on the slope of a density interface between two stably stratified fluids under wind. Jin Wu 335

Laboratory models of sea straits. David A. Anati, Gad Assaf and Rory O. R. Y. Thompson 341

Steady flow in rapidly rotating variable-area rectangular ducts. Part 2. Small divergences. A. Calderon and J. S. Walker 353

The generation of sound by vorticity waves in swirling duct flows. M. S. Howe and J. T. C. Liu 369

Lagrangian velocity covariance in helical turbulence. Robert H. Kraichnan 385

Review

Proceedings of the Fourth International Conference on Wind Effects on Buildings and Structures, edited by K. J. Eaton 399

Part 3 13 July 1977

The steady movement of a liquid meniscus in a capillary tube. C. Huh and S. G. Mason 401

An experimental investigation of flow in an oscillating pipe. M. Clamen and P. Minton 421

On conditioned averages for intermittent turbulent flows. César Dopazo 433

Structure of the turbulent boundary in drag-reducing pipe flow. B. U. Achia and D. W. Thompson 439

Some experimental studies of vortex rings. T. Maxworthy 465

Magnus effect in saltation. Bruce R. White and Jan C. Schulz 497

Onset of convection in a fluid layer overlying a layer of a porous medium. D. A. Nield 513

Upper-bound problem for a rotating system. N. Riahi 523

On the generation and radiation of magneto-acoustic waves. L. M. B. C. Campos 529

Separation in a slow linear shear flow past a cylinder and a plane. A. M. J. Davis and M. E. O'Neill 551

Cellular convection with liquid-film flow. E. James Davis and C. K. Choi 565

An inviscid bluff-body wake model which includes the far-wake displacement effect. Masaru Kiya and Mikio Arie 593

PART 4 5 AUGUST 1977

An analytical solution for the profile and volume of a small drop or bubble symmetrical about a vertical axis. A. K. CHESTERS *page* 609

Effect of tube elasticity on the stability of Poiseuille flow. VIJAY K. GARG 625

Hydrodynamic instability of viscous flow between rotating coaxial cylinders with fully developed axial flow. K. C. CHUNG and K. N. ASTILL 641

Further experiments in nearly homogeneous turbulent shear flow. V. G. HARRIS, J. A. H. GRAHAM and S. CORRSIN 657

Computation of the flow between two rotating coaxial disks. M. HOLODNIOK, M. KUBÍČEK and V. HLAVÁČEK 689

Photogrammetry of spherical shocks reflected from real and ideal surfaces. J. M. DEWEY, D. J. MCMILLIN and D. F. CLASSEN 701

Eddy diffusivity, eddy noise and subgrid-scale modelling. HARVEY A. ROSE 719

Viscous sheets advancing over dry beds. J. BUCKMASTER 735

The formation of layers in a double-diffusive system with a sloping boundary. P. F. LINDEN and J. E. WEBER 757

The unsteady expansion of a gas into a non-uniform near vacuum. R. E. GRUNDY and R. MCLAUGHLIN 775

CONTENTS TO VOLUME 82

PART 1 19 AUGUST 1977

Kelvin–Helmholtz waves in the ocean? J. J. MAHONY *page* 1

Nonlinear wave propagation in a two-dimensional steady transonic flow. PHOOLAN PRASAD and E. V. KRISHNAN 17

Influence of the amplitude of a solid wavy wall on a turbulent flow. Part 1. Non-separated flows. DANIEL P. ZILKER, GERALD W. COOK and THOMAS J. HANRATTY 29

Turbulent mixing of passive and chemically reacting species in a low-speed shear layer. R. G. BATT 53

Inertial convection at low Prandtl number. MICHAEL R. E. PROCTOR 97

The starting mechanism of wave-induced flow through a sharp-edged orifice. R. A. EVANS and M. I. G. BLOOR 115

Long-term dispersion of contaminants in small estuaries. RONALD SMITH 129

Upstream influence and Long's model in stratified flows. P. G. BAINES 147

The return to isotropy of homogeneous turbulence. JOHN L. LUMLEY and GARY R. NEWMAN 161

On choking flutter. Y. TANIDA and Y. SAITO 179

The blast waves from asymmetrical explosions. K. W. CHIU, J. H. LEE and R. KNYSTAUTAS 193

PART 2 7 SEPTEMBER 1977

Numerical analysis of turbulent end-wall boundary layers of intense vortices. JOSEPH CHI 209

A contribution to an inviscid vortex-shedding model for an inclined flat plate in uniform flow. MASARU KIYA and MIKIO ARIE 223

An inviscid numerical simulation of vortex shedding from an inclined flat plate in shear flow. MASARU KIYA and MIKIO ARIE 241

Shear layer instability of an inviscid compressible fluid. Part 3. P. G. DRAZIN and A. DAVEY 255

Characterization of the formation of base sheet paper using spectral moments determined from time-series models. WARREN R. DEVRIES and S. M. WU 261

The initial region of subsonic coaxial jets. Part 2. A. S. H. KWAN and N. W. M. KO 273

Stress in a suspension near rigid boundaries. AYDIN TÖZEREN and RICHARD SKALAK *page* 289

Solution of three-dimensional incompressible flow problems. S. M. RICHARDSON and A. R. H. CORNISH 309

Steady compressible swirl flows with closed streamlines at high Reynolds numbers. KARL GOTTFRIED GUDERLEY 321

A numerical model of the air flow above water waves. Part 2. P. R. GENT 349

Unsteady flows in a semi-infinite contracting or expanding pipe. SHIGEO UCHIDA and HIROSHI AOKI 371

A note on the westward drift of the earth's magnetic field. W. W. WOOD 389

PART 3 27 SEPTEMBER 1977

Formation of the hexagonal pattern on the surface of a ferromagnetic fluid in an applied magnetic field. A. GAILĪTIS 401

On steady flow in a partially filled rotating cylinder. ROGER F. GANS 415

A method-of-characteristics calculation of coronary blood flow. JOHN A. RUMBERGER and ROBERT M. NEREM 429

On the growth, limiting thickness and dominant eddy scale of turbulent shearing layers in the atmosphere. MARTIN LESSEN, ALBERT BARCILON and THOMAS E. BUTLER 449

Nonlinear stability of parallel flows with subcritical Reynolds numbers. Part 1. An asymptotic theory valid for small amplitude disturbances. NOBUTAKE ITOH 455

Nonlinear stability of parallel flows with subcritical Reynolds numbers. Part 2. Stability of pipe Poiseuille flow to finite axisymmetric disturbances. NOBUTAKE ITOH 469

Grid turbulence near a moving wall. N. H. THOMAS and P. E. HANCOCK 481

Stability of time-periodic flows in a circular pipe. W. H. YANG and CHIA-SHUN YIH 497

The accelerated fully rough turbulent boundary layer. HUGH W. COLEMAN, ROBERT J. MOFFAT and WILLIAM M. KAYS 507

The slow motion of a rigid particle in a second-order fluid. P. BRUNN 529

A note on the motion of a spherical particle in a general quadratic flow of a second-order fluid. P. C.-H. CHAN and L. G. LEAL 549

Convective instability of stably stratified water in the ocean. S. LEIBOVICH 561

An approximate theory for the streaming motion past axisymmetric bodies at Reynolds numbers of from 1 to approximately 100. MICHAEL S. KOLANSKY, SHELDON WEINBAUM and ROBERT PFEFFER *page* 583

REVIEWS

Topics in Applied Physics, volume 12. *Turbulence, edited by P. Bradshaw* 605

Turbulent Jets, by N. Rajaratnam 607

PART 4 14 OCTOBER 1977

Internal gravity waves in a time-varying stratification. RICHARD ROTUNNO 609

The excitation of damped waves diffracted over a submerged circular sill. H. D. PITE 621

The refraction of head seas by a long ship. Part 2. Waves of long wavelength. F. URSELL 643

The motion of two-dimensional vortex pairs in a ground effect. STEVEN J. BARKER and STEVEN C. CROW 659

The scattering of short surface waves by a cylinder. G. ALKER 673

Simple rotational flows. J. A. SHERCLIFF 687

Experiments on the structure of turbulence in fully developed pipe flow. Part 2. A statistical procedure for identifying 'bursts' in the wall layers and some characteristics of flow during bursting periods. T. R. HEIDRICK, S. BANERJEE and R. S. AZAD 705

On the theory of solitary Rossby waves. L. G. REDEKOPP 725

Stochastic closure for nonlinear Rossby waves. GREG HOLLOWAY and MYRL C. HENDERSHOTT 747

Growth and equilibrium of short gravity waves in a wind-wave tank. W. J. PLANT and J. W. WRIGHT 767

ASSISTANT EDITORS

DR H. E. HUPPERT, DR D. J. JEFFREY, DR M. E. McINTYRE

EDITORIAL ASSISTANT

MISS M. E. LUCKING

Authors wishing to have papers published in the JOURNAL should communicate them to any editor named above, choosing one in their own country where possible. The submission of two or three copies will expedite the process of assessment, although it may not be possible to return all these copies. Original drawings for figures should not be sent until the paper is accepted.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts for the printer should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript.

Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Fluid Mechanics*, please apply to the London or New York office of Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in five volumes of four parts. Single parts cost £6.00 net (US $15.00 in the U.S.A. and Canada) plus postage. The subscription price (which includes postage) to volumes 79–83, 1977, is £20.00 per volume (US $47.50 in the U.S.A. and Canada) for institutions; £10.00 (US $23.50) per volume for individuals. Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue.

CONTENTS TO VOLUME 83

PART 1 1 NOVEMBER 1977

Three-dimensional natural convection in a box: a numerical study. G. D. MALLINSON and G. DE VAHL DAVIS *page* 1

Laminar boundary-layer flow past a two-dimensional slot. IAN J. SOBEY 33

Nonlinear deep-water waves: theory and experiment. Part 2. Evolution of a continuous wave train. BRUCE M. LAKE, HENRY C. YUEN, HARALD RUNGALDIER and WARREN E. FERGUSON 49

A note on some nonlinear water-wave experiments and the comparison of data with theory. BRUCE M. LAKE and HENRY C. YUEN 75

Stability of time-dependent double-diffusive convection in an inclined slot. C. F. CHEN and R. D. SANDFORD 83

The effect of Brownian motion on the bulk stress in a suspension of spherical particles. G. K. BATCHELOR 97

Waves on water jets. J. W. HOYT and J. J. TAYLOR 119

The diffusion of scalar and vector fields by homogenous stationary turbulence. EDGAR KNOBLOCH 129

Long surface waves incident on a submerged horizontal plate. P. F. SIEW and D. G. HURLEY 141

On Hamilton's principle for surface waves. JOHN W. MILES 153

A note regarding 'On Hamilton's principle for surface waves'. D. MICHAEL MILDER 159

A two-dimensional boundary layer encountering a three-dimensional hump. F. T. SMITH, R. I. SYKES and P. W. M. BRIGHTON 163

Variable-viscosity flows in heated and cooled channels. H. OCKENDON and J. R. OCKENDON 177

Variable-viscosity flows in channels with high heat generation. J. R. A. PEARSON 191

REVIEW

The Thermodynamics of Fluid Systems, by L. C. Woods 207

PART 2 22 NOVEMBER 1977

Small perturbation expansions in unsteady aerofoil theory. J. M. R. GRAHAM and I. KULLAR 209

Experimental study of the stability of heated laminar boundary layers in water. A. J. STRAZISAR, E. RESHOTKO and J. M. PRAHL 225

Computational and experimental investigations of two-dimensional nonlinear peristaltic flows. Thomas D. Brown and Tin-Kan Hung *page* 249

Rods falling near a vertical wall. W. B. Russel, E. J. Hinch, L. G. Leal and G. Tieffenbruck 273

Differential equations for long-period gravity waves on fluid of rapidly varying depth. James Hamilton 289

Heat transport and thermal structure in the interfacial boundary layer measured in an open tank of water in turbulent free convection. Kristina B. Katsaros, W. Timothy Liu, Joost A. Businger and James E. Tillman 311

Wind-forced linear and nonlinear Kelvin waves along an irregular coastline. Allan J. Clarke 337

Eulerian and Lagrangian renormalization in turbulence theory. Robert H. Kraichnan 349

Steady and transient thermal convection in a fluid layer with uniform volumetric energy sources. F. A. Kulacki and A. A. Emara 375

Review

Aeroacoustics, by M. E. Goldstein 396

Part 3 5 December 1977

Finite amplitude instability of plane Couette flow. Terence Coffee 401

Effects of horizontally two-dimensional bodies on the mass transport near the sea bottom. Jacques Lamoure and Chiang C. Mei 415

Wall shear stress caused by small amplitude perturbations of turbulent boundary-layer flow: an experimental investigation. D. Ronneberger and C. D. Ahrens 433

Numerical solution of conservation equations arising in linear wave theory: application to aeroacoustics. Sébastien M. Candel 465

Acoustic scattering by density gradients. A. J. Kempton 495

Laminar flow in a square duct of strong curvature. J. A. C. Humphrey, A. M. K. Taylor and J. H. Whitelaw 509

On the dispersion of small particles suspended in an isotropic turbulent fluid. M. W. Reeks 529

Microscale temperature and velocity spectra in the atmospheric boundary layer. R. M. Williams and C. A. Paulson 547

Unsteady flow in a supersonic cascade with strong in-passage shocks. M. E. Goldstein, Willis Braun and J. J. Adamczyk 569
